December 3, 2002

TECHNOLOGY CENTER R3700

Sir:

In response to the initial Office Action mailed July 3, 2002, please amend the above-identified patent application as follows:

IN THE CLAIMS:

Please add the following claims:

- Sub B8
- A1
11. (New) An archery bow dampening device, the device being made of an elastomer and having a base portion and substantially wedge-like extension portion suspended from the base, the base portion having a contact area, the base portion being fixedly attachable along its contact area to an archery bow to absorb the energy of the vibratory oscillations, resulting from the abrupt return of the limbs and the string of the bow to their original positions, through expansion and contraction of said dampening portion,
- said suspended portion being configured for vibration, free of contact with the archery bow in directions which are generally normal to the longitudinal axis of the archery bow reciprocating in the plane of the bow,
- a notch formed in the device and an insert both made of elastomers,
- said insert being disposed within the notch, and
